

Meixin Zhu

The Hong Kong University of Science and Technology (Guangzhou)
No. 1 Duxue Road, Nansha, Guangzhou, China
E-mail: meixin@ust.hk • <https://scholar.google.com/citations?user=5Ysgg7AAAAAJ&hl=en>

INTERESTS

Autonomous Driving, Reinforcement Learning, Driving Behavior, Traffic-Flow Modeling and Simulation, Traffic Signal Control, Multi-Agent Reinforcement Learning

PROFESSIONAL EXPERIENCES

The Hong Kong University of Science and Technology (Guangzhou), Guangzhou, China

- Tenure-track Assistant Professor Sep 2022 – Present
 - Systems Hub, Intelligent Transportation Thrust

The Hong Kong University of Science and Technology, Hong Kong, China

- Affiliated Assistant Professor Sep 2022 – Present
 - Department of Civil and Environmental Engineering

EDUCATION

University of Washington, Seattle, US

- Ph.D. in Intelligent Transportation System Sep 2018 – Aug 2022

Georgia Institute of Technology, Atlanta, US

- Master of Science in Computer Science (online) Jan 2021 – Present
 - Specialization: computational perception & robotics

Tongji University, Shanghai, China

- Master of Science in Communication and Transportation Engineering Sep 2015 – Jun 2018
- Bachelor of Science in Traffic Engineering Sep 2011 – Jun 2015

RESEARCH EXPERIENCE

Motional, Software Research Intern

Jan 2022 – Jul 2022

- Behavioral planning for autonomous driving.

Amazon, Applied Scientist Intern

Jun 2021 – Sep 2021

- Last Mile ML Science Team. Developed a new model for last mile delivery optimization.

Oak Ridge National Laboratory (ORNL), Research Intern

Jun 2019 – Dec 2019

- Signal Timing Control for Large-Scale Networked Intersections
 - Advisor: Hong Wang
 - Proposed three new multi-input and multi-output (MIMO) traffic signal control methods (based on **feedback control**, **LQR**, and **bilinear modeling**) that can improve network-wide traffic operations in terms of delay and energy consumption.
 - A 35-intersection network of Bellevue, WA, is used as the basis for the development of the algorithm, where modeling and intersection controls in a globalized setting are established using MIMO linear control theory and high matrix formulation.
 - The proposed control methods were evaluated in a microscopic traffic simulation environment, VISSIM. Simulation results show that the proposed methods have much shorter average travel delays in the network when compared with the delays of conventional pretimed and actuated controls.

General Motors, Research Assistant

Apr 2015 – Jun 2018

- Shanghai Naturalistic Driving Study Data Analyses
 - Collected 60 Chinese drivers' real-world driving data, with a total mileage of 161,055 km.
 - Investigated decision-making mechanisms for essential driving behaviors based on 108,933 car-following events, 17,309 lane-change events, 7,845 cut-in events, and 3,256 vehicle-pedestrian conflicts.
 - Calibrated, validated, and cross-compared five representative car-following models and found that the intelligent driver model (IDM) performed best for Shanghai drivers.
 - Investigated the impact of a forward collision warning system on drivers' car following behavior.
 - Developed two autonomous car-following algorithms with deep reinforcement learning: one can perform human-like car following; the other is capable of controlling vehicle velocity in a safe, efficient, and comfortable manner.

China First Automobile Work (FAW) Corporation, Research Assistant

Dec 2011 – Dec 2015

- Driving Behavior Research for Intelligent Collision Avoidance Technology
 - Examined the effects of situational urgency on drivers' collision avoidance behaviors using Tongji University's eight-degree-of-freedom driving simulator.
 - Developed a kinematic-based forward collision warning (FCW) algorithm that is compatible with drivers' risk perceptions and behavioral responses.
 - Implemented the proposed FCW algorithm in Tongji University driving simulator, and evaluated the system's performance, warning timing, and safety benefits.

AWARDS & SCHOLARSHIPS

- 2022 Transportation Statistics Interest Group (TSIG) Student Paper Award Jan 2022
- 2nd Place, Transportation Forecasting Competition, TRB AI Committee AED50 Jan 2022
- Graduate Student Travel Award, PacTrans Jan 2022, Jan 2020
- Most Cited Paper, Transportation Research Part C: Emerging Technologies Apr 2020
- Wining Award, 2021 Digital China Innovation Contest Apr 2021
Top 4 of 1332 teams, Smart Transportation-Collision Detection based on Big Data of Internet of Vehicles.
- Second Place, Poster Competition of 2020 PacTrans Student Transportation Conference Nov 2020
- Outstanding Graduates of Shanghai, Shanghai Education Commission Mar 2018
Top 5%, for outstanding graduate students in Shanghai.
- National Graduate Scholarship (twice), Ministry of Education, China Oct 2017, Oct 2016
Top 0.2%, for outstanding graduate students in China.
- Outstanding Student Award, Tongji University Oct 2016
One of 44 awardees from the 13,864 graduate students in Tongji.
- China Graduate Mathematical Contest in Modeling, Second Prize Sep 2016
- Volvo Scholarship, Volvo Group Dec 2014
One of 15 awardees in China, for outstanding engineering students.
- National Competition of Transport Science and Technology for Students, Second Prize May 2014
One of 8 winning groups in China.
Project: Traffic Parameter Analysis Platform based on Unmanned Aerial Vehicle (UAV).
- Mathematical Contest in Modeling, Honorable Mention Jan 2014
Paper: Modeling the Keep-Right-Except-To-Pass Rule Using Cellular Automaton
- National Endeavor Fellowship (twice), Ministry of Education, China Nov 2013, Nov 2012
Top 3% of all the undergraduate students in China.
- China Undergraduate Mathematical Contest in Modeling, Second Prize Sep 2013
Top 5% among over 30,000 competition teams in China.

TEACHING & VOLUNTEER

- Instructor**, CET590 Traffic Systems Operations, University of Washington Fall 2021
 - Basic topics
 - **Traffic System Control**: Pretimed/Actuated Signal Control; Freeway Operations.
 - **Traffic Simulation**: Modeling with VISSIM; VAP; Driver Behavior Models; Behavior Model Calibration.
 - Advanced topics:
 - **Traffic System Control**: Proportional–Integral–Derivative (PID) Control; Linear Feedback Control, Model Predictive Control (MPC); Linear Quadratic Regulator (LQR); Deep Reinforcement Learning; Traffic Control Case Studies based on Cutting-Edge Research; Autonomous Driving Research.
 - **Traffic Simulation**: Modeling with SUMO; Python for Controlling VISSIM and SUMO Simulation; Advanced Driver Behavior Modeling Methods including Imitation Learning, Inverse Reinforcement Learning, and Sequence to Sequence Models; Automatic Behavior Model Calibration.
- Teaching Assistant**, CET590 Traffic Systems Operations, University of Washington Fall 2020
 - Homework grading and tutoring, simulation tutorials, and final exams preparation.
- Teaching Assistant**, Statistical Analysis in Transportation Engineering, Tongji University Fall 2017
 - Preparing course slides and tutoring students on SAS coding.
- Volunteer**, Knowledge Discovery and Data Mining (KDD) 2021 Conference Summer 2021
